the galactic university

a division of
galactic central

the purpose

providing final studies ...
for the certification of all galactic personnel
and ...
for the general education to all galactic citizens

to being ... becoming a homo sapiens ...
to be a guardian of this universe !

the condition on this planet is so gruesome
every human will be tormented to his death
before he is one year old !

in fact traumatized >
so he will never be able to really see reality
as is ...

will then be trying to become a success story
in the eye of his environment >

but of course being a total failure
if considering the ultimate law of creation !

>>> to using creation only as designed by creation <<<

so ... becoming a criminal for life !

because what ever honorable he will be trying to do
will not being accepted by this planet of satan !

there by ...

any thing criminal > damaging the environment

damaging humans ... beyond repair >>>

will being cherished by those masses of insanity !

because those will only being enticed
when seeing a catastrophe ...

because they are trapped as well by their illness ...

of being a product of this gruel environment !

everything therefore nothing >>> real ...
only this mirage > of sparkle !

with which they then squander one world after the other
in a few hundred years

they could be lasting xxxx million years > with all humane life !
not have to be sick competitively > mentally disturbed in character
if not physical ill ... zombies of their traumatizing !

and this knowledge we have to bring forward
not how to make a career to annihilate > everything ...
and still be stupid enough >>>

not to even notice !

in contrast ...
conditions in any society
on any planet in any galaxy
under our domain are so heavenly >

no one would ever be breaking any law !

would never be breaking any thing >
let alone breaking humans >

considering no evil ...

ever !

because we are the guardians of this universe ...
being the guardians of creation !

you may well be having the aspiration
of wanting to be doing no damage !

of being the guardian of creation ...

but just look at your doings >
your drinking > your eating >
damaging your health !

climate control of your buildings >
your traveling > wasting your energies >
resources >

looking for no real solutions ...
all evil !

most of all >
nobody should be working
more than 4 hours a day
on his profession

then to grow and harvest
what he will be eating
a few hours every day
and then helping to cook meals !

otherwise you will
be losing your reference to
rest of the universe !

and never bake or fry any thing >
boil eggs and meat at under 200 f
and when needed only ...

up to boiling temperature
and make it all as short a cooking as possible
meaning everything as small as possible >

or too many vitally needed vitamins are destroyed !

the principle of star peace

the meaning of life of a human > is to work out a decent way of life
realize it > live it > guarantee it for all !

because only then he is a human being !

and therefore there is no meaning here on this world !
as there is no human order

because humans only want to live decently > can be > must be!
otherwise they will be dissatisfied > until they can live as humans !

so to achieve this > the meaning in life of each person
is to make just this happen

until then ... they feel like losers > indeed they are in reality!
only by their conceit procurement > this is represented as a success >

documenting a day in the life of > first planet < in
the year 154 after creation

of the first human settlement in this universe

note a responsible life style ... can not only
be the biggest fun in the universe

but being the only life style ... working endlessly

because every one can be convinced of what he is doing !

forever

since we are homo sapiens ...

we

have of course no democracy

certainly no secret and free voting

but

of course an argumentocracy

meaning

... where the best solution

is

used by all

because only

the best solution

can be

shaping our future for all eternity

where our universe and all worlds

are preserved to eternity

and should someone

bring

forward a scientifically provable

better

solution

> then this will be used

of course we have no theocracy

even though it is our entire existence

to conserve this universe and all its people

so

... we live according to a religion

there is no humanity with power positions

but

an alienating hierarchy

and

alienation creates automatically

and principally

criminal energy

which

will lead to a secession

as

soon as no power can prevent it

because

power exertion makes it natural

to creating

this cleavage

of

course there is no money here

and

consequently no capitalism

since

this only can be the end

of every

thing

we create everything that we need

so

.... that we have everything

and

of course we can keep it

for millions of

years ...

we are looking at > first planet > at our very right
> the sun >

below left > what is looking like a tiny moon > being the
space ship >

watching out for the safety

parked in geo stationary orbit over the settlement >

with only the sensor doors open !

we are seeing no lites an the planet be low !

no sign of any settlement ... or manufacturing >

the only thing to indicating any population as of now >

are the out rigger sail boats beached > the solar electric
rovers > the river boats

but there is an emergency plan ready to put all those under cover
should any need arise !

the camouflaged hydro electric plant at the river falls is not
operating

the lites for orientation in all the housing and control centers

is being supplied by tiny local thermo nuclear power plants

from the former uses on the roboter ships

and planet rovers

there is no other kind of any human population any where from here
....

naturally

... no broadcasting
of any radio trans mission of this
world

can be received at any distance !

as all communication
is done > by quanta
communicators >

low power short distance equipment or through
under ground lines

we are now in the main command room > the display showing
>>> automatic surveillence mode on >

no space sensors > no space ships > now asteroid on
coordinates **6 39 15.70 > 2 16 22.17 >**

received quanta message from planet two > but no frequency
messages >>>

since automatic mode started !

the crew sleeping > like all residents be low on the
planet

we are now going toward the first planet > seeing a roboter
ship > monitoring the settlement >

seeing a predator going toward it notifying the nearest
planet rover automatically at the planet surface

there the animal repulsion system is activated > and the tiger
is making a U turn and going off

we are now in a cave > at the rivers bank > seeing two
children in the dawn of the new day !

the increasing light being brought in their room by an automated
mirror from the rising sun >

the led clock showing 5 45 the date 05 03 154 >
at this moment >

the boy is waking up and looking what time and saying aloud >
having to be getting up soon !

when his sister is opening her eyes too

now we are in the kitchen of the cave > where the boy is
telling his parents there >>>

that he does not want to go to school today > but be playing
with his friends at the river

his mom asking him > what they are having in school today ?
and he startles

because he was to show off his experiment of mixing colors today !
so ... he thinks > he will be going to school today after all
...
to be showing off > an electric motor

where a disk of all colors in sectors
will be becoming an off white once turning ...

the mother saying >

we are having > commanders day 100th anniversary coming up in 3
days

then we will all be having off ... and dancing and singing
together all day long

do you remember what he has been doing for us ?

yes ... says the girl > he was the founder of our religion >
he and his crew of a space ship

put the tyrant and his bandits of the empire on a planet to die
...

while having time to realize all their wrong doing ...

and settled this world for us > free of any wrong doings

I am > because we all are !

and we can be >
because I can be

what is the supreme law ?

the universe ... and any world
use only as defined by creation !

and consequently from
this derive >

all commandments
>

all fundamental rights from!

as well as the requirement
for peace !

all must recognize the
present reality

and then ... guarantee a new !

meaning an accountable life

providing for all ...

no mirage >
without conceit !

without physical force >
without taboos ...

all must be addressable !

meaning capable of >

being a responsible citizen ...

then he went off in his spirit later on >
leaving his body behind here >

to be helping a native population living after our religion in
some other galaxy !

and this day we are celebrating > what he having done for us
....

all their other relatives are coming in now ... many being over a
hundert years old

they are fixing breakfast now > from the seeds they have been
collecting days ahead

and rolling them out > soaking them since last evening and now
adding fruits and nuts to it !

after eating the kids are going off to school > half of the
adults are going collecting lunch ingredients

the others going to their work since this being the first
settlement ... the galactic council being here

and the co ordination of all the things to being done >

the council members are considering
the danger from the asteroid >

sending a roboter ship to it >
to making star dust out of it >
to fertilizing our planet !

the message from planet two
will be considered now ...

to our dear galactic council members

as you know

*we have arrived at our new home month ago !
taking inventory of all plants and animals
pathogens and toxins ...*

*atmospheric components being confirmed ...
animal population is in a very early state !*

*having selected a location for the new settlement !
like our first> at first planet ... at a river bank
in a desert within the tropics >*

*since the sun shining less than
at first planet > we will be limiting the settlements
to the near equator ...*

there are limited places for caves ... so >

we will later be building partially submerged housing there >
since the bank mostly does not have enough slope to it
and since there be no more need for
exclusively camouflaged housing ...

we will be all moving into are new housing now >

to be celebrating commanders day ...
all together on our new future planet !

leaving the space ship two > at automatic command mode ...

our dearest regards to all of you >
for having made this possible

commander ss2

the council members compose a reply and congratulations >
for the successful start of a new settlement
on the second planet ...

there while in a another galaxy > the spirit of the commander !
still working on an evolution to a higher race > there !

the harbor being down river > the space craft factory being at
the hydro electric plant

up the river ... right here > many service work shops for
all the technology used

note books having direct led screens ... using less than 1 watt
>

the rest having only 100 mhz > and the OS being optimized

as well as all the applications for this

there is only one model for each use >

and that being build to last a 1000 years

then at 11 they all coming together again to eating lunch

under the trees by the river ...

then at 1 pm they are going to take place at the workers who are
now hunting

and collecting for dinner and the next day until 5 pm

then eating together with their families ... after they are just resting and talking things over

so no problems are unsolved ... till at about mid night > they are having a snack

to be sleeping again till the morning

there is no hierarchy ...

because this would be an alienation and be a coming problem for all !

everything must be transparent >
everything must be understood by all !

only in an emergency
> there is a command structure > thus eg in a spaceship

at a sea crossing > so
if there is no time for talks !

but even then all orders ...
spoken about in retrospect >

and reviewed by all ... to find the
better answer !

just as there is no democracy or theocracy
...

since only ...

if all can agree > the answer will be right !

and only if there is no
time there will be > temporary solutions used

till

a valid solution is found !

and should any individual or a group

not be responsible for our
universe > not willing to be responsive ...

then this necessity will be carried
forward with all force !

while there is every freedom to act on your own >

there must be no exclusion for any one or any thing >

everything

must > stay part of creation !

because as soon as anybody is excluded he will be
feeling alienated

then

arises >>> a criminal association ...

and each organized crime on a world >

even this whole universe >
we will prevent !

there can be no freedom for the destruction of a
people

or a world > and this is the core of
our religion !

where there is no deception what so ever

only

homo sapiens > knowing exactly > what they are doing >

and

what effect this is having on eternity ...

and now ... a thousand million years later

... our commanders idea still working fine !

the only difference > we are having populated around a
million galaxies

where there are an average a million planets each ... having an average
of a millions

so we are a real trillion strong > 1 xxx xxx xxx xxx xxx xxx homo sapiens

but still there is no where
any war >

no force necessary ... since we solve any problem every day
...

so our galactic nation > note singular !

because we are all united to keep things just this way

meaning there is no competition for any thing worthless !

destructive

we are using still the same concept technology

no need for a million different printers > pcs

but to having total star peace guarantied !

so now ... we are having to look at this very great problem

many millions of lite years away in what those problems there

call their milky way

so we are now in geostationary orbit over this planet earth !

this being like a cold shower in the morning
already from this distance >

because we are seeing a million lites > on the dark side of
the planet !

because these poor things need to be having all this diversion
going on

till they are falling asleep in their bed while watching
television !

our spectrum analyzers having millions of signals
already received since from very far away

we are now checking out the planets environment
seeing all this floating garbage drifting in the oceans
checking water quality > contaminated with heavy metals
while predators are going strong !!!
and are under conservation ...

the smaller fish are being depleted

insanity where ever we are looking !

because these democracies > are having those in power
having the greatest insane ideas > every where waste >
frustration
entertainment > diversion > illness > speeding from
one idiocracy to the next !

we can not stand this any longer we are having to call
the **galactic pest control** ...

because nowhere > can those natives even discuss their
problems ...

let alone solve them !

and we see just clearly for our very eyes > what those
insane will be doing

in a million years wasting all this galaxy and then
beyond

we need to realize >
that this here ... is the planet of
satan !

where the
individual either will ...
taking care of his psychopathic interests >
at the cost of
this world > meaning this environment and his
people
or he must
believe that everything will be >>> well
at the end !!!
otherwise he will not be desirable
anywhere
because
shunned all over !
because
the aspiration of this satan
is definitely the enslavement of this population
for the purposes of the
destruction of this planet >
and this is not the first time !
around 75 million
years ago > this project satan has been started
and another world was
destroyed and many millions
made to evil zombies of this satan !
these
souls then came here > and created

this planet of satan!

meaning

incarnated

in these chimpanzees >

and their mischief started again ...

only if

we realize this reality > in everything we do
> retain >

we can keep the evil of using us > as the
zombies for his envy !

meaning

use us for his purposes > meaning destruct gods
creation

because this evil

> is just envious of gods
success !

he can not bear this creation ...

as well as

many of this population > can not stand this
creation !

because otherwise they

would not deny its existence

and

without any belief in god

going down the road of destruction

or all of these co

operating "religions">

meaning this hypocriticals ...

the ones > continuously

as zombies just helping this evil
satan ...

because not

be heeding this reality !

money can only be the biggest
problem !

just think of ... you wouldnt have to get it every
which way you could !?

and then you couldnt go to a car dealer and buying one
of those

biggest problems you could think of > and then you
couldnt

get to a gas station !!!

and wasting all the hydro carbons

and in 10 years > this contraption would be needing
a replacement !

there while you could be getting a solar electric car
> lasting a milena !

wasting no resources > and making a lot more fun to
drive it !

if only your government would allow you to be driving
this slow

and you could be affording to buy one of those

on the contrary > if there is no money >

and you do not need to be driving around all over >

and you work place is right next door and all of
the things you need !

are right there > being brought to you by hydro
electric power train

by solar voltaic river boat > or being right there
produced !

what a wonderful world this would be

where every one would be doing things >

because they want to be doing them !

because they are having all the time >
to making every thing lasting for ever

and they are not having to making them to sell in
competition

but just giving them away on any one appreciating them

everyone

must answer for themselves
>

whether he is working
for his successful dying !

for example > in
the now economy
be a shame of himself ...

or if he
is working on a future

for example.... guaranteeing
human

dignity ...

and long term safety !

and everyone
must bear the consequences

for his doings
.....

he who believes ...

that there be a
difference in principal

between the past and the today's nations

or between
all these nations here off

is having a
thinking disorder !

because everywhere

today and in the past >

people in a group are forced
into line !

and these groups forced to a nations line

and then all
the nations ... to

see how a climate is flipping

!

because nowhere >
is the universal law in
effect

meaning the law of this
universe > the
creation of this !

so this whole idea
of a sovereignty
> being wrong

because no individual can
be free > about his

aspirations >>>

except his personal preferences >

so " I prefer now to put

some green garb on or maybe

"

neither ... can any
nation decide >
whether it >

will be wasting the planetary resources
now

or can any world
decide > to

have all these environmental
disasters

nor can this galaxy
decide > whether
or what law she to
have

since

everything should be responsible
>

therefore understandable > meaning human !

so there can in principle > be no
animals in a human settlement !

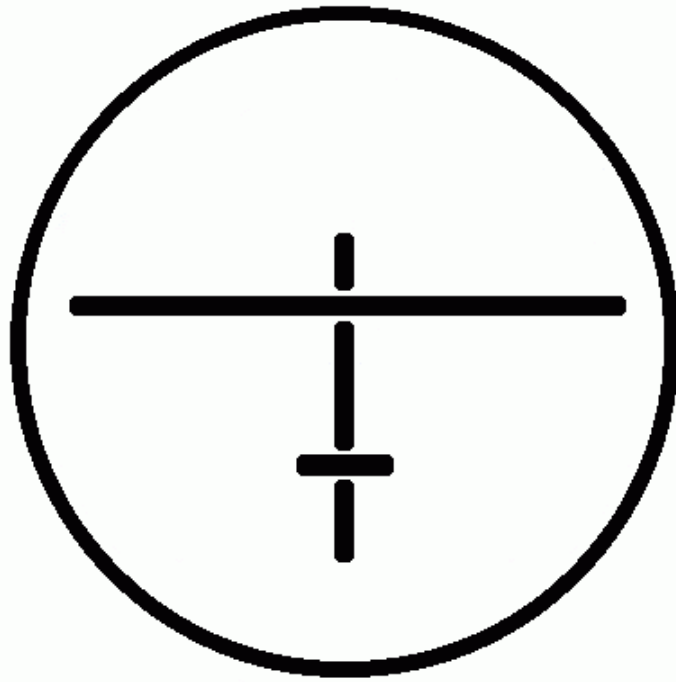

that is simply
unacceptable>
because they can >
never understand >

that it is not human > to behave like an animal !

or a bug

creation ... seeming to us

the result of an emerging entity
in the dark and empty space before
commonly called god here on

and this ... our creator
dreaming about worlds of wisdom
and we are the children of
the guardians of
his universe

there while this
planets population
are the misfits of satan
the anti creation

dreaming about a fata morgana

of themselves
as the highest entities
in this universe belonging
to some one else

and as all fata morganas
this can never be realized
this same arrogance
having created

all this aggression > colonization
all this environmental disaster
all these religions that never
having created any thing
but delusion

and as all fata morganas

>

but massively fed from a
remote mountain range

where on both sides
everything grows in abundance!

on the steep hills on one side

we build an
underground settlement in the light tuff

where already natural
caves exist by erosion

we are digging further
inconspicuously from these

our underground settlement

where every morning
the sun shining in ...

to wake up every one!

then we are
working in the work shops until lunch

afterward

.... working outdoors ...
getting animals and fish

until

dinner ...

as well

> we are having under the protection of the
trees along the river

the laundry

... bath ... and all big workshops set up

and the big

kitchen ...

because there to every thing >

easier to transport to !

and there ... we as well are eating
all together

afterwards only contemplation and
discussions with the family

the first children of this
new world are growing up

and some appropriate
after their training

will then colonize other worlds !

we are using

the thermo nuclear generators of the robot ships

to

having energy in abundance until we build
bio gas plants

where all the bio waste will get in there
....

for cooking and preparing
hot water!

for

our gas power plant ...

afterward

shall the mud again be supplied
back to nature

as a fertilizer!

we do not want to use
hydropower for now

until we are sure > that it will not
expose our existence

so far > no
report from the telescope on our spaceship

meaning no imperial ships
or probes

we find
crude fibers to weaving ... for fabrics and
making clothes!

we
build an outrigger sailboat to crossing the
river ...

and trips to the nearby
coast ... where grass seeds are growing
and everything other we can use !

to getting
all we need
for the growing population
....

saving them from going into barbaric competitions
through incarnating him self into the native population !

he informs some of us > of a means to call him

but he can only with his mind come back to us >

his body we should bury after his death
in the burial chambers in the mountains
near our settlement

.... the message

on the intergalactic frequency we receive one day
a wireless message > from a radio amateur ...
reporting of the end of the empire!

we are considering what to do?
we could fly to another position>
to not directly betray us ...

and reply from there ... but what could help this ?
such a sick population as this there
no man can help with words!

there is not even a possibility
our intention ... our lives to describe here!
they would not believe us even >
that there are homo sapiens in this universe!

and why would anyone want to limit itself
in its power ruling ... for to good of the future ?

if these offenders there only just do not want to do this !

we could fly there>
and what could we do there ?

we could start a war with these now stakeholders >
could free them > of their stupidity!

but who would want this ? we want certainly no war >
they want only their irresponsible life !
this now crystal clear

so who then wanted to start a war ?
if not any danger no chance of having any success ???

there is not even a real law and order there >
not any real religion for homo sapiens!

no conscience > no haze of something other ...
only power play ...

and when we would free those slaves
and selecting a 1000 from the general public and then flying them here
we have 1000 potential tyrants here >
problems for our future !

there is a treatment for those >
but since those would have to want to first being healthy>
and which a disease wants to get ... well ?

we thought that it was just >>> the emperor !
but now we know > that it is also each and every one tacking part in this >

because ... we could have taken part in this further >
in this eternal game of the rulers eien

where only the position of power decide > how much does he savore !
how many resources squandered how much the environment contaminated
how many people forever tortured to death!

of course ... we will not reply >
as we never send out radio waves !
which can leave our world ...

we shudder only ... if we think of all of these !

it is not just about our security >
it is about the future of this whole universe

100 years after

we have many settlements on our world
we visit with our vector fin outrigger sailboats
and deliver key parts

we build solar voltaic freighters for inland navigation
and areas with little wind

we have at a waterfall ... far above our river
a hydroelectric power plant ... installed underground>
and on the cliffs there >

a roof with vegetation on top camouflaging a factory
for our robot ships and space ship production ...

for ground transport > we build desert rovers >
with solar voltaic > electric drive ...

of course bicycles

with direct front wheel hub drive !

we stay young through proper eating
and as well exercise every day in the sunshine ...

of course because of our satisfaction!
and because we know to be doing the right thing

we use> the thermonuclear generators >
from our robot ships etc > after exchange>
for a long time coming !

for example in the settlement area
where the weight factor / current output are of no concern

then after centuries using them there > the remains >
are splitted further by artificial neutron bombardment >
and will these residual isotope to becoming lead >>> nontoxic

over the whole period of time ... the waste heat
continue to be used or the electricity produced

of course will mine the uranium > for this to begin with >
safe > meaning underground > and with mine robots

so there will not only be no danger> created for the environment
but de facto > the radiation dose from this natural source
even be reduced in the long term

the whole production process of this thermo generators

and their reuse conversion > will of course be done with robot systems
and monitored by us via video continuously >

our pc have ... inclusive monitor >
a power consumption of < 1 watt equivalent
because our programs are so optimized > that they are only some mb
and consequently only need a few mhz !

there is only one kind for any purpose
so there are spare parts and renovation for
millions of years guaranteed

our lighting fixtures have led > and by oversizing them >
therefore maximum efficiency > use only a few milli watts >
under difficult working conditions ... under one watt
and they are functioning some millions of hours

ofcourse we apply sun radiation via mirror deflection
in our workshops > wherever possible

ofcourse we work normally only in the day time
and our lighting is for guidance mostly
in our living places at night ...

1000 year after

we scan further along our space environment
crumble all meteors > which are dangerous to us
so they fall as star dust only

we visit for the first time our world of origin !
and film the destruction caused by endless wars
and the exploitation of resources

but never make contact with the few survivors
they because of lack of metals > are living ...>
dying like in the stone age !

we as well are also making no contact
with any vermin and predatory animals

who simply have no use for our way of life
are pure creature of instinct ...

slaves to their criminell environment !
simply atrocious ...

compared with us > where you can not even see >
that there are people living > because we save each screw >
every piece of metal and reuse every thing !

never make anything out of order
or build it just for a limited time
but for an eternity

although we seem to have no enemies anywhere
but just for the esthetics > we camouflage all technology
laying high voltage dc lines in the river eg

all the other ... can be camouflaged in an emergency!

we are now hunting ever more predators
to save the smaller kind for us to eat

as well ... as in the river and oceans

so we are having enough to eat
for our growing population

we are now developing for the colonization of planets
on which are no suitable bodies to incarnate
and are too remote

small ultra fast robot ships
with seed cells and eggs ...

many dozen ... with automated breeding care

and if this is happening on their new home planet >
so ... possibly thousands of years later >

we are sending there > some spirits from our home planet
where they then incarnate directly into the developing baby ...

a million years after

our original world ... does not ... have any more people
on it ... because of the contamination everywhere ...
the lack of resources and foresight

and because of this hopeless stupidity
they are gone extinct ...

we have now settled several other worlds in our galaxy
and through immaterial mind transfer > some other galaxies
for our life as homo sapiens

there are no wars > no contamination > no hunger in our civilisation any where
because all ... are part of every thing ... all have the possibility
within the line of the rest of us to realize all we want

we show our videos ... of our former world
in social political ... and religious lessons !

and no one can believe it >
that there is such a mentally handicapped population possible !

we exchange ideas via mental visits with the other galaxies
as well our former commander

being the beginning at the council galactic central

as well the beginning of the galactic nation exists already !
we continuously contact all via quantum communicators ...

the galactic religion ... the essence of our life > perfected
seeing any risk for our intelligent life ... long ahead
having an answer for everything !

everyone can be helping to perfect ...
we all want to live in a paradise
for all ...

where there are no victims > no perpetrators >
no sham > no conceit all true and real

paradise everywhere !

one thousand million years

later

we are represented in many galaxies >
by mental transfer

through the incarnation in advanced animal bodies !

and should there be no animal body to develop
the egg and seed transfer via extreme fast robot ships
and the incarnation of spirits send from their home planet

and over all this time to have our idea
endlessly proven ... the homo sapiens race !

only there was ... just mean idiots selections
created by such a stupid idea > as this world here

where as one idiot with the other competing >
to all these idiots delight ... in their insanity >
the great stupidity the great enslavement !

creating meaningless jobs !
see house hold delivery of toxins !
people being driven to freak out!
to preventing any solutions !

see this planet satan here

the further development of the galactic religion

we have been thinking all these years about ...
how we could protect our way of life against any destruction ...
so we develop our religion further >

what is the supreme law ?

the universe ... and any world
use only as defined by creation !

and consequently from this derive >
all commandments >

all fundamental rights from!

as well as the requirement for peace !
all must recognize the present reality
and then ... guarantee a new !

meaning an accountable life
providing for all ...

no mirage > without conceit !
without physical force > without taboos ...
all must be addressable !
meaning capable of >

being a responsible citizen ...

with the 12 commandments to define this better

and how all of this is being today > [galactic religion](#)

the meaning of a human life >

being to work out a
decent way of life

realize it > live it > guarantee
it for all !

because only then is he a human being !

and therefore
there is no
meaning here on this world !

as there
is no human order

because humans only want to live
decently

can be > must be!

otherwise they will be dissatisfied with themselves
>

until they can live

as humans !

so to achieve
this >

the meaning in life
of each person

is to make just this happen !

until then ... they

feel like losers >

eves

insane aspiration of
the true love

thus ... the

person she will select >
being as in any animal
tribe >

to spoil her
immeasurably
this existing
for millions of
years

and until 100
years ago ...
this was just inhumane !

but today
.... this
being the big animal love ...

straight to
be the problem
... because eve
still >

will marry

the great pamperers ...
materially and
or psychologically >

a homo sapiens having not
the slightest chance !

but in a stone age society >
roughly equivalent with
adam

but in this western version

> where eve can
sit around

and wait

until her requirements
of this insane love
is full filled >

guarded by a
so inhumanity
as this insane western

society >

where useless work

he adores
... yes >

must worship mother
mary !!!

otherwise he
would never becoming a pope

of course there
are exceptions >

of any outbursts over
all this injustice !

so if a man
to lock her in the cellar

or he

then savor heir satanic
symbiosis fully !

if no one will
constrain her > such as a religion >

a tradition >
a society!

while in
this country they are so glorified

because they
too are

just a mentally retarded
choice !

from this it followes

... a mentally

retarded world

how is some adam ?

care for something

then to savor his satanic symbiosis

if no one here

to force him

other wise >

such as a

religion > a tradition >

a society !

while in this

country he is so glorified

because they

too are a mentally

impaired choice !

from this we follow

a mentally

retarded world

how is a free market
economy to function ?

if they may only

build rummage >

going of next week in the garbage

while the
climate being
flipped > squandering
the resouces
>

environmentally damaging

...

otherwise they will not selling
long any thing !

how is there supposed to be
justice ???

in such a satanic
world

and how should
this pest

allow ... any homo sapiens
?

if they can not
be in a position
to >

even knowing > what was right
or wrong

as soon as the
individual

themselves are out of bounds of

the general future
design

for example ... because

they want to hide their criminal intentions
....

meaning ... this idiot selfishness
to further savor
just this

or any individual > eg
the responsible >

being excluded !

can this be no

humanity >

but a criminal
association !

because only
when all have
part in it

and most importantly ...
may be part of this
>

can this

be a righteous and consequently
honorable society !

and the honor of
every one must always be the

first priority

.....

thus we need all to be heard >

observe all
valid arguments >>>

and on this
basis

meaning this compiled ...

public reality >

make our
decisions >

our
future design !

otherwise this
is not a rule of law

but a criminal
association ...
as usual

this
will not be functioning long

see

as well the 11th commandment of the
galactic religion !

and only
having a
decent ...

honorable future design

a true
living together

can prevent

the certified freedom from " humanity "

**life should be
about human dignity !**

about an inteligent life ...

because only if every one is being treated as an inteligent human
can there be a human civilization long enough to even blink your eye

so ... life should not be a game at ever higher levels
should not be about > making out of pawns > big players !
that is simply absurd ...

because the planetary resources will not be there long enough
for even a million years !

nor the very environment !
nor an inteligent population ...

because players will not be responsible citizens !
because their endeavor having just not this very important >
basic ingredient in there !

so we need no highly educated players !

we need responsible entities ... and their capabilities are then used >
for the security ... the human dignity of all for a billion years !

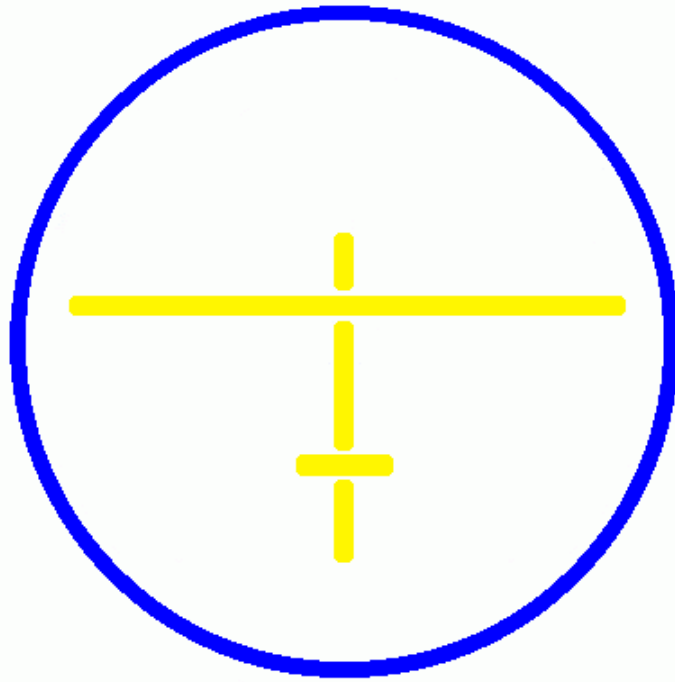

on this planet > and for eternity on other worlds ... in other universa

so ... all power emanating from the government schould be about >
to guarding human dignity

or every thing will be over in a 100 years !
its clear to see for any homo sapiens ...

the galactic nation

*having been created under the authority of the cgc
as a safe home for all homo sapiens in this galaxy*

*we are calling any galactic nation so
since in such a galactic nation
we re having actual*

*governing through
an total argumentocracy
including via quanta communication
every where*

*where as in the next level towards
the whole of creation*

*being the cosmic nation
being naturally restricted
to im material communication
and travel*

*and to a settlement
via simple spirital means
where as in any galactic nation
there being settlement at least in part
done by actual genetic transfer*

*further more will a member
of the counsil galactic central
be working in his local galaxy*

*there while
transferring information
to and from the first planet*

and his local four group

*of the 4 galaxies around
his own galaxy*

*so again we are calling him
the counsil galactiel central*

*because he is a
biological resident in his galaxy*

*there while staying connected with the whole cosmos
through im materiel communication only*

our aspiration

*this is not about us today and tomorrow!
or about this world in millions of years ,
still having sufficient resources!
a life supporting climate on this world*

*as well not in this galaxy in a billion years
settle on another world if this here goes to an end !*

*but this is all about eternity !
and everything not compatible with this is worth nothing.*

at any time will be conscious of the responsibility for his world !
because of a continuing exchange with the rest of the world population !

the galactic religion

we are the guardians of creation

**all religions established today on this planet
where not ment for the modern homo sapiens !**

but for their ancient societies with their totally different reality !

this is the reason > for writing up this extension of those aicient religions
since modern society does obviously not work with out !

since we need a new explanation for all things ...
to solve the problems of today !

these earthly religions

there is no evidence at all
to fulfill the creation

but the stupidest fairy tale
that in this universe
being to find

>>> so let us start
with these christian churches
who prescribe a love for death
so believe in our fata morgana
and you will certain
finding death

and then after your earthly death
you will be rewarded for this shame
killing all the environment
all homo sapiens

with the heavenly kingdom with the father !!! ?

being not the creator at all
of this universe can be

because the vision of the creator >>>>
that people fulfill his creation
creating worlds of wisdom
so coming true

a humanity with fulfillment
fulfilling and with it the vision
fulfilling of the creation

>>> then we go geographically
to the east

to this islam
which is definitely a guide
and the probaganda to a power seizure
the whole world and that in the purest stone age way
also with the sword

>>> then to the budists
the ones with this lucky idiot
creating the most mentally handicapped
that someone can think of
in competition too
the one above

competing

to be happy !

>>> then on to these sacred cows

so again to worship animals

>>> then to zen budism
which can be proven to be a guide to death
were all these young people in japan
can no longer take part
in this suicide
the one there too
take place

and redeem themself immediately

>>> of course
we do not need to lead on
that all of these nature religions
no vision of creation
fulfilling

no humanity fulfilling
no sapients at all
fulfilling

summary >>>

so we have
not only no valid religion on this world
but only animal vanity procurement
to the destruction
of everything
and

everyone

the creator of the universe

can be easily being said
to represent

the perfect

but a new world
arising today

just being the beginning

of fulfillment

of his creation

this needs
the perfect homo sapiens
for this fulfillment

so we need
the perfect air conditioning
for our all buildings

so that we are sustainable
and well protected

from the imperfect nature
going towards our fulfillment

we also need solar rovers
who give us the necessary transportation
guarantee for our fulfillment

we also need abolition
all of these predators

so that they do not eat humans
and no humans eating away
the useful animals

of course we need the elimination
of the secular state ... of the democratic
the capital of the criminal economy
of money in general

we do not need a theocracy either
because we are the perfect people
and know that we

can not exercise power
we have to do everything ourselves
can understand

of course we have to get by this idea
a heavenly paradise far from us

since no creation in heaven
we can perfect

so we need earthly biology
to create dams

for inland navigation
for the generation of wonderful energy
the storage of this energy

preventing flood disasters
the creation of infinite food
water storage for dry periods

so we know that a paradise on earth
just too easy to create

we just need
the evolved sapiens
to perfect

I know now
that a heavenly paradise
not the answer to the need
an un perfect creation
to be perfected

we need the wise innocence
of a mother maria
in a woman

transferred

with infinite wisdom
who realize that a heavenly paradise
not the ultimate meaning in their existence

but only this unsullied innocence
can help imperfect creation
be perfect ourself

adding all of this biology
perfect this creation

and the fulfillment of all
thereby

guarantee

the religion of the galactic nation

all these established religions today ... have only one task >
to guard these " faithful " against their own irresponsibility !

in the best case ...
they are living responsibly > but are not politically active!
and this was necessary > in the past

because otherwise these religions would have not been legal
been viable!

in the worst case
they are even irresponsible themselves !

because in a free society >
necessarily goes hand in hand > the accountability !!!

this applied as a citizen ...
so he must not only be free in his decisions
but he must be able to answer for them !

just as with any religion >>>
gods decision to let each and every one have his freedom
automatically and necessarily ... becoming his personal responsibility !

and therein lies the whole evil >
because all these free " citizen and believers " do not do this !

they just want the freedom > the money > the power >
especially > the conceit procurement !

but not a responsible lifestyle >
nowhere > no one in this world > because not even >
for the same reason > it never give you a rule of basic law !
so all just have to be world bandits > with these all to compete ...
otherwise they were members of their religion >
citizens > friends > coworker !

otherwise nothing more will be possible for them !

the visitor

already from space coming
any intelligent visitor ... will see >

that this planetary population can be no homo sapiens!

just looking at the illumination of the dark side of the planet!
and this mass of radio transmissions for broadcasting entertainment

when every one should be resting !

because every human needs contemplation
otherwise he will be > becoming insane !

then ... when the visitor closing in and all this garbage to be seen
he can only turn away disgusted>

and when we are coming down on this ... "earth" then ...
every one is running from one drug of entertainment >
to the next > drug of food

or this guarding the peoples humanity >>>>
with wolves > with state licensing dog tags!

or just looking at those ideas > this population has
about an extra terrestrial civilization >

no longer ... any rest period at all
just endless fun !

or the "search" of this earthlies >
for extra terrestrial ... via radio waves

then we know for sure
that this can only be simple a mass in sanity

and should more evidence of this be needed >
then we need just to look at this animal love !

when every homo sapiens is knowing >
that animals never want to live in human dignity ...

this is a very unusual superiority >
of the homo sapiens in this universe

consequently they are> the only such > long enough there>
not just to settle one galaxy

but the whole universe!

now we will show >

what was at the beginning of time and how the universe came to be

because > to know what to do today >
we have to know what was and why is every thing here now

at the beginnig of time > there was only emptyness every where !
why ? > because at the beginning there could only be nothing

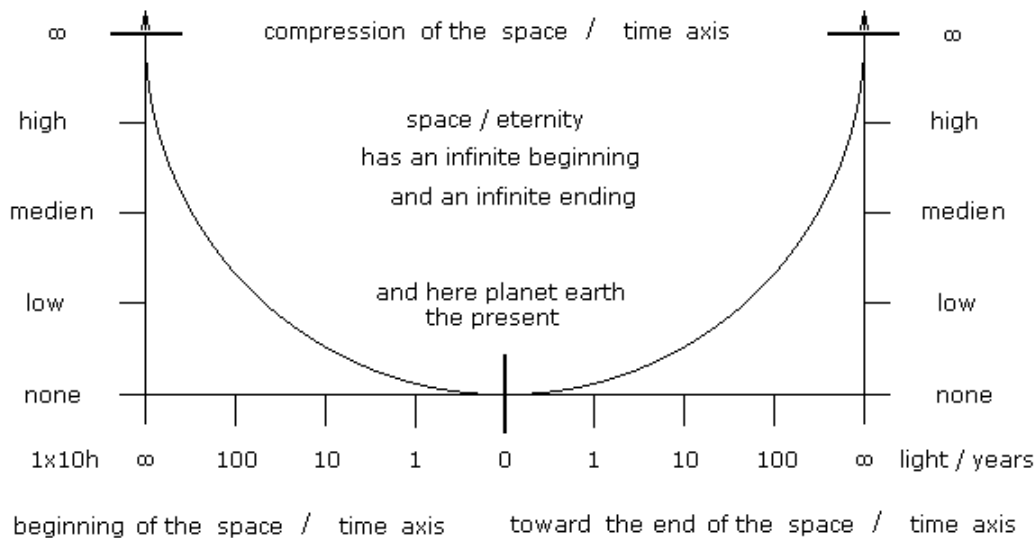

where would it have come from ?

but space has been there all ways ! it was definitely not created at the big bang

because ? > what would have been there before ? but empty space >>>>

space / eternity from the beginning till the end

fritz.roth@proadesign.com

now some one will come up and say > there ist no beginning and no end of time !
and shurely > the beginnig of time was with out a start > end less !
and the end of time is with out an end >>>> infinite !

and then ? ...how came the universe to be ? ...
where did all the hydrogen gas came from ?

since this is equal to energy !
there must have been something who created it !
and what could have created all this energy ?

in an empty space ? >> only a creater <<

having been created by him self in this empty space

SO

*this is not about us today and tomorrow !
or about this world in millions of years

overcoming their animal existence -
acting according to eternal responsibilities -

they would be creating a paradise on earth -
and live on forever

no one can think ... what he wants !

this is as insane > as if the government enslaves its citizens
with senselessly > polluting resource squandering > forced labor !

those are no humans > but animals and vermin
who do not enjoy human rights because they are not guaranteeing them !

there is for the individual > only one thing to do > acknowledge the reality >
that the creation is > to honor and respect > having the first priority!

and for each nation > there is only the same > acknowledge the reality >
that the creation is to honor and respect > having the first priority!

the government being only there to ensure the safety of his citizens
and guaranteeing his honor !

and this > has to be observed globally and every one not observing this
being a world criminal >

to be shunned by humanity !
and put somewhere in a penitentiary > where the damage >
all these world criminals have been causing ...
will be repaired again!

What is the supreme law ?

the universe ... and any world

use only as defined by creation !

and consequently from this derive >
all commandments >

all fundamental rights from !

as well as the requirement for peace !
all must recognize the present reality
and then ... guarantee a new !
meaning an accountable life
providing for all ...

no mirage > without conceit !
without physical force > without taboos ...
all must be addressable !
meaning capable of >

being a responsible citizen ...

the limits of darwinian evolution !

selection of the fittest on planet earth !

every group ... every society selects only those > helping them to stay criminel !
to spoil the environment ... wasting all the resources ... causing a new great flood ...
and every one just pointing this out ... is " insane " will be going into exile ...
prison or to a psychiatric institution ... if not just getting ill and dead !

since if the population would listen to them ... value them ...
there would be solutions possible ... and with out catastrophies

what would satan do ?

this all means that we can not have a homo sapiens race on this planet
but a competing mass of criminal apes

being at the very least passiv about this so obviously wrong ful doing !
meaning there can not possibly be a future coming up

only through a continous stream of discusions >
could the basis for a functioning plan be worked out !
because reality is then present to evolve such from

but with darwinian evolution only insane vanity is present !
because only those who entice the insane masses are left > after
solitary confinement at best !

has brought every sane individual to extinction

so this population is not having any problems !
but every one else is competing to be really the fittest guardian of the problem >

his society this native planetary population

the planet of satan

we need to realize > that this is the planet of satan !

where the individual either will ...
taking care of his psychopathic interests >
at the cost of this world > meaning this environment and his people
or he must believe that everything will be >>>> well at the end !!!
otherwise he will not be desirable anywhere
because shunned all over !

because the aspiration of this satan
is definitely the enslavement of this population
for the purposes of the destruction of this planet >
and this is not the first time !

around 75 million years ago > this project satan has been started
and another world was destroyed and many millions
made to evil zombies of this satan !

these souls then came here > and created this planet of satan!
meaning incarnated in these chimpanzees >
and their mischief started again ...

only if we realize this reality > in everything we do > retain >
we can keep the evil of using us > as the zombies for his envy !
meaning use us for his purposes > meaning destruct gods creation
because this evil > is just envious of gods success !
he can not bear this creation ...

as well as many of this population > can not stand this creation !
because otherwise they would not deny its existence
and without any belief in god

going down the road of destruction
or all of these co operating "religions">
meaning those hypocritical ...

the ones > continuously
as zombies just helping this evil satan ...

because not be heeding this reality !

so ... this world is something special >
something after the story " adam and eve"

only it exist in billions of them respectively!
which are not destroying paradise > but all their environment

the symbiosis is working the following way >
woman is helping satan > destroying this world

and satan is helping woman >>>
to destroy men and children !

creating zombies to fulfill their satanic aspiration

and as soon as a homo sapiens anywhere is showing up >
adam must compete with the other zombies >
to eliminate these disturbing the peace of this ...
her horror show !

because of course
no eve wants to hear about their own shame !

and their selection ... in all these generations
makes this phenomenon possible!

eve always chooses the organic delusionals !
eve selects only adam!

until half the world's population will be gone in 100 year
as zombies can not design a future

SO

*at the beginning > there was only biological insanity !
and at the end > is now this total mass of insanity governing this world*

*no discussion > because no reality is accepted anywhere
and only with the acceptance of reality > can there be a future*

so the 11. holy commandment says > " you shall not refuse reality ! "

*by surrounding your self with others > having the same non reality as their basis
for all your wrong doing !*

and the 12 commandment goes >

" you shall not lose your world " !

*because without an environment supporting life without the necessary resources
there will be no life > no fun !*

because all other religions success > is being based on ...

not the solution !

and the galactic religion is so power full >
it needs not to convince all of this worlds population
to being successfull >

just one in a million will suffice
for this world being saved from the rest of this world !

because every one is his own prophet
who will not follow any rule

unless he truely understands and is convinced him self !

most of all >
he can discuss every aspect of his philosophy with any one >
because all his believes > are absolutly true !

meaning just 7 000 believers
will make a paradise out off this planet !
there while ... all the other religions >>>>
could have most of this worlds population as believers
and this world would not be saved from the end !

because we will not tolerate any one

so > where today > every body being insulted to death
in its more or less high intelligence

where the lowest gifted > being at the highest position

galactic security organization

the security in a galaxy ...

can long term never be reached somewhere

through violent measures
not corresponding to cosmic reality
being only excuses for the rulers there ...

and excuses for the terrorists > who >
these violent orders can not accept ...

only an intelligent life

[our cosmic community](#)

why am i still here?

of course
because it cannot be ruled out
that this criminal selection

somehow survive !!!

and with her search to destroy everything

at some point becoming
a threat to the whole universe!

there fore a danger for
all intelligent living
over all in this

a shame for the creation this one in any case

so I have to work on this
work out the exact situation!

because the sooner we know about it

the better ...
be that for all homo sapiens !

all over ...

the aspiration

of every existence
should capture reality
to be of his existence

the apprehension of earthly reality
the capture of cosmic reality

and never the escape from this reality
so the escape from any responsibility

where this all madness resulting from

it is about the realization of all people
not about the realization

of his own madness
because the person in question is unable to
realize himself

but only seek his freedom
to create his vanity ... insanity
because he be about to kill his world

every human

so it is about gaining wisdom

no power to exercise can be guaranteed
no escape from wisdom

because you are on the run
before its failure

the quality mark of an individual

so existing
his ability to argue
not in his power ability
with the help of his mass
incompetent

destroying everything of value
so all of these on here ?

I can so far
not find a single one
that does no harm

so be a plague
and this democracy
is the evidence there for

mean while an argumentocracy
the proof that this argument is capable
be able to prove their worth

that because all democrats
prove their rulership

democracies
are based on their principle
of power seizure of the majority

hence this power seizure
nor do they guarantee human rights

but only rulers
so damage rights

climate tilt right
enslave rights
predator rights
contaminate rights

so everything
only harm

meanwhile an argumentocracy
the evidence of a human race

who can not argue
can not be human
but an animal

because unconscious
the are driven offenders

would these democrats be worth anything
then they could all have this value
conveying to every one

they guarantee a legal state
without police ... military ... probaganda

so we only have quantity here
equal amount ... equal destruction

not a single native person
there is no wisdom

no rule of law

only the argumentocrat
has the wisdom
being right

the quality
the being in themselves
the value decides

who ???
can give a better description
deliver a better reality ???

who ???
a better solution ???

of course for all homo sapiens
in this universe
so this one

million x million x million

do you have a better solution?

can they even know anything?
or do science?

or just with the help of their mass
destroy all future !

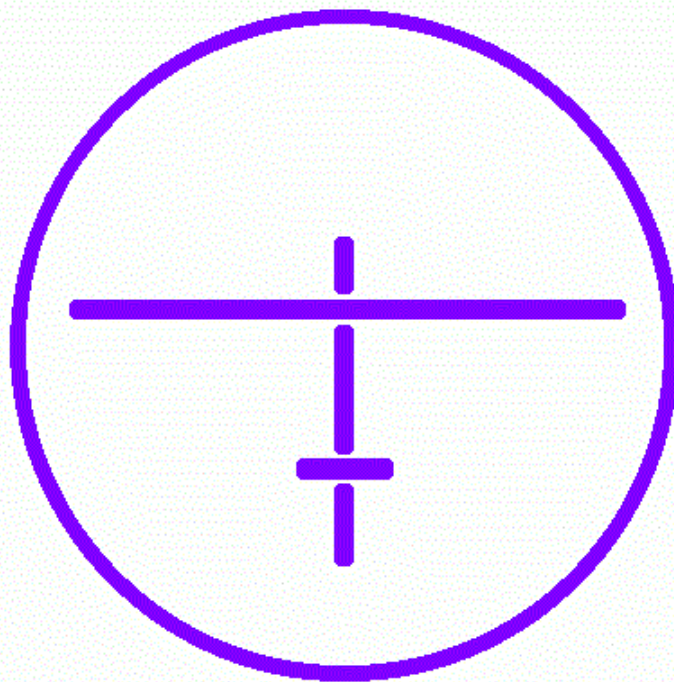

only a

[argumentocracy](#)

can guarantee an endless decent order !

**the
institute
of
cosmic religion**

bringing

the latest cosmic research
about the questions of being
to all homo sapiens
in this cosmos

so every one can be finding out
about the true vision of creation
being there by the only valid
religion for all

... the science for a future organization ...

we are finding
that the creator of this universe
having created him self

in the former dark and empty space
wanting light and endless worlds of wisdom

so all he would need is developing the will
so he could with out creating any energy
at all

but out of part negative energy
and part positive energy
be creating all

this ...

his universe

so all homo sapiens wanting fulfillment
could on endless worlds of wisdom

without war tribes
predatory animals
any in justice
or illness

going toward their fulfilling
being not only the guarding
of his creation

but as well
the fulfilling

if there would not be
all this pest on

all those loved ones

are those who united
are loving each
other

to being united shames
eliminating all wisdom

so they can destroy
every environment
every humanity

>> what fun
dying can be !

so why are all ?
being so stupid ?

because this is what all
have to compete with !

according to
darwinian selection ...

this planet vanity

where every one be just concernd
about hindering out of jealousy
about all real success
all this fulfilling

here on

this planet satan

where all those satanic states
are just guaranteeing satanic rights
of war and destruction
of illness

of all this stupidity
and thereby hindering
the fulfilling of all

so

while we should never
becoming aggressive physically

we should always pointing
with all aggression necessary
to all hindering the fulfillment
of all

only then
will the vision
of creation

being the beacon of light
als in million x million worlds
in this universe
being real

and maybe countless worlds of light
in all this cosmos

where we should
in the darkness of night
be contemplating every night
this vision of creation

to realizing
this longing for light
at every dawn of a new day

we are about the science
for the cosmic religion

based entirely on cosmic reality

with no dogma
only the cosmic reality

being our guide

for all questions
any one may ask

for the last thousand x million years

any one can surely believe in
there being no doubts possible

where the real sociality
being brought forward

being the realization
of an

argumentocracy

based again on cosmic reality
where every solution being brought forward
since every one is having a voice

no hierarchie what so ever
except cosmic reality
except scientific
science

where we have at the end
not one problem

only solutions
for our endless paradise

humans

need a humanity

because there they are free
creating more value every day
for themselves and their humanity

there while any pest
a libertine dumb competing
needing anarchy rights

every day more damage done
because a majority
is fundamental

no righteous state
no value it all

only one power means
so coming to power

so making
the seizure

because competing parties
guaranteeing all this damage
safeguarding destruction interests

so

we need

the wisdom

bringing to the highest level
for everyone

since only with homo sapiens
we achieved the changes

through all of this failure
being able to rectify again

that being
why we need

every

potential

of every one to promote
for the positive competition
fanning on everywhere

that we

guarantee a future
and never again

this negative competition
so this inevitable failure

there by
the elimination
of every success
being delivered

so we finally have to
reach an

enlightenment

around this world for the
next hundred million years
a future to rescue

so that we can
to the fulfilling
in all this universe

or the galactic pest control will have to come
to relieving all this poor pest
without any violence

[the galactic foundation](#)

and here
the cosmic community
in existence

our cosmic community

the galactic university

the institute of eternity

a department of

the galactic university

at the beginning

of eternity

there was nothing

since

what would have created any thing ?

there could only have been
an entirely empty space !

and then over an eternity
there in this totaly empty space

an entity starting
to develop himself

dreaming of light
in this total darkness

and over a further eternity
he started to make with his will
one eon after the other

out off nothing
just his will to wanting light

anything
except for this complete emptiness
and because this universe
having no energy

you can create it the way
that there is no energy creation
needed

because the whole being zero
a part of it negative energy
part of it positive energy

our mind

being non biological
but communicating with any brain

thereby any part of biology

being only needed

to making biology function
to exist and move

any plant having a spirit
having the capability
to guarding
itself

so

our mind being every where
the cosmic spirit being in existence
since the beginning of creation

this spirit having
created

creation

and our existence being
for the fulfillment
of creation

being our own fulfillment

as well as any other biology
being useful

for the fulfillment of creation
becoming part of eternity

there while
any thing hindering
the fulfillment of creation
being eliminated

from eternity

[the galactic foundation](#)

postulate

even though

we are having all proof
that this universe having a vision
for its creation

we are here argumenting
without even any intrinsic vision
by this universe itself

that having an order
guaranteeing human fulfillment
is necessary for a life to eternity

because if any democratic party
is saying they are doing

what will be creating jobs

then this will not
save any environment
any humanity

because then we will be having
only non human entities

being inspired by this stupidity

un able to even principally
inspireing any real human

but just some dodos
wanting darwinian success

the same will apply
for guaranteeing predatory rights
being nothing but destruction

ergo

not human
since any predatory animals
will only be eating away
all the nourishment
humans need

if they are not eating them
themselves

there while not bringing inspiration
to any intelligent being

the same will apply

for any artistic doings
since no one in his right mind
will care about

any thing not bringing reality
where humans will be inspired by

again only some dodos

so

what being necessary
for an eternal life in principle ?

we need to ask any homo sapiens
being full of wisdom

what they think
will bring humans fulfillment
till eternity

so

we are hearing from those sapiens
that we need to ask what will bring
a solution for all

not what problems
any majority of a nation will want
for their vanity production

for their mass suicide

intelligent life needing positiveness

meaning solutions
meaning meaning

meaning creating value

any thing making sense

for

humanity

so needing an

[argumentocracy](#).

so now we can based on this
conclude

that any creation wanting
not only light during the day

but endless inspiration through
all this argumentation going on at night
in any intelligent being community

inspireing all of them
for the next day to eternity

to be saving humanity

is about to be bringing yourself alive

since without a humanity
you can not be living

just dying

sons and daughters

of sons and daughters

of sons and daughters

of sons and daughters

of sons and daughters

of perfectly animal
adapted chimpanzees
over million years

always only
guaranteeing their own survival
being never a human being
having human rights

never the global environment
never a climate

only the homo superesse
the survivors

those who have no wisdom
no legal ability

only the boasting

dodo

who is guaranteed to die out
as soon as the environment
being a survival
no longer

allow

so as soon as the portuguese come
or as soon as the 2nd venus is here

with steaming seas
only rocks ... rubble
and sand

only high temperature bacteria
to be bragging about
we will

with the help of a democracy
the ability to survive
get going there
a leader
select

our survival politicians
to our madness
not to
lose

because that being the only thing
what these are all going after
a bacterium successful
achieved

bragging around
we are the craziest
only of them grew up
having madness

no human
will have such
a strange idea come up with

no one will ever
be allowed any where
with so much madness

no human
can help those
lose their madness
since this is the only thing
what these all ...

have

no humanity

no environment

no real success

no eternal life

eternity.institute@eternity.institute

now some one will say

creation

needing the potential
for creating ...

creation

being the totally empty nothingness
of an entirely empty space

where then an entity emerging
developing himself

to the perfect wisdom
of arranging this nothingness
to negative energy and positive energy
to becoming matter

and then the plan
that this creation

needing first plants
then animals

to develop any emerging planet
with this primitive life

but then to having homo sapiens
to emerging out of this primitivity
into intelligent biology

becoming this same perfect wisdom
as creation needed to have

meaning creation was just the beginning
of having worlds of wisdom

millions x millions of them

and then needing the wisdom
to being the guardians of all this creation
finding any danger to this success
of creation

and trying to make any stupidity see
that what they are doing

being no life it all

but a competing dying
on this planet dirt

where we are seeing only decay and destruction
and all this slavery for wasting creation
for wasting any start of
any fulfillment

of
creation

but creation needing
the competing perfect wisdom
to fulfilling ...

creation

the formula of life

showing

that any human
achieving his fulfillment
through the freedom
to being a

human being

and that
any hindering
any enslavement
be prevented

any fanning
to this insanity
this suicide

the formula of death

insisting on

that all just seem

holy

legal

successful

in a majority democracy

being only there

for the seizure of power

to continue

to destroying everything

no human rights

no argumentocracy

no future

only the driven force

of insanity

by which

any environment

every human will

crush

meanwhile people

having only victims rights

so they should

as long as possible

be dying

meanwhile being victims

of this power seizure

be the majority

robot

fully charged up with energy

produced by >
united shames incorporated

programed for >
united shames world wide

to be guarding the vanity
of united shame

meaning ...

all those have
nothing to want

just their liberty
to being stupid
in this age of
being stupid

where all environment
all humanity is being

wasted

for nothing it all
but vanity

no wisdom
no success
no future possible

not only nothing

our

wisdom

can only be the highest quality
the end of the development
of any human

being in every community
taught in any kindergarten
up to the highest university
the fulfillment of all
to guarantee

in contrast
to this losing ability
which being taught everywhere
in any such a state
making sure

that no one be likely
becoming fulfilled

and why are all these against
any fulfillment ?

only these vanity procurement orgies ?
all this disaster glorifying probaganda ?

because they only maybe
a vanity procurement artist
because they are only losers

because all and
any other losers would be
becoming jealous

having to recognize
that they are only gilded losers

meaning

the principle satan

who out of envy
of this success
of creation

has to destroy this creation
so that he will brag about
we are the powerful
losers here

because everyone could see this
so he would be capturing this reality
at all letting come to his mind

but just the escape
exactly of this reality
being the goal

so why

am I writing

this up ?

do I want to push anything
on some one ?

do I want to create a dogma ?
do I want someone ?

be keeping from his fulfillment ?
of being a successful loser ?

no

I want nothing at all

everything I write here
everyone can understand !

as the cosmic reality
being self evident

that these all are a failure
that these all are not even able
their global climate to keep

even denying this fact
or their failure to even recognize
their fault

so what being ?
this cosmic reality ?

of course

to everyone to recognizes this
learning the understanding
and then being this

meaning

the only way of life
where every ones fulfillment
being guaranteed

because as soon

as any one denies this reality
being the attempt of a prevention
of this very reality

he having lost
contact to this reality

determining
that everyone can just the fulfillment
of all guarantee

to find his own fulfillment

and any one out of touch
with this reality

being this disability
being a tyrant

meaning all those x xxx millions
must be prevented

otherwise all fulfillment
of all those real trillion homo sapiens
being a million x a million x a million
in this universe

would be prevented

and I do not write that
to achieve anything other

just the fulfillment

of all and every one in this cosmos

and the knowledge of this reality
meaning the cosmic infinite reality
then bringing the fulfillment
to every one

to any single recognizer of this reality

meaning a world without wars
without illness ...

only fulfillment
only endless satisfaction
guaranteed security

and
the endless competition of all
for this fulfillment
to becoming

fulfilled

meaning
straight to the opposite
of a life outside the cosmic reality

here on planet dirt

and not a single fata morgana
with will be bringing
only death to all

now

not

a single failure

anymore

so

how do we

realize this condition ?

of course not
asking the problems
created by this problem
democracy

where by
in every new election
all the politicians

having to make
more insane promises
to be able to come to power
to waste all

humanity
all environment

but we have to ask
every citizen

in an
argumentocracy

what kind of solution
he will come up with

for all the problems created
by democracy

and then every one other

will have the chance
to improve this proposition

or bringing forth a better one

all in the light of real scientific
evaluation

till no one can come up
with a better solution

for the good
of all of humanity

for the fulfillment
of creation

[the argumentocracy](#)

but

what about satan ?
and all this problem creation
of democracy ?

what would they then ?
be bragging about ?

we are no longer losers ?

argumentation

being the key to real success
to the genesis of becoming human in general
because the darwinic only applies
for biological entities

there while a dodo
yes not at all able
bringing a world
to an end

only can
these symbioses
of predatory animals and dodos
so these bragging technology monkeys
that should never exist

since those already now
there self murder assassination fully accomplished
because it has been possible for 10 000 years

no more homo sapiens at all !

and before that it was just a primitive
always on the run

like today too

since there being no adaptation
at all possible

only the idiot artist
can do this

so the ones
which only from an artificiality
can rave about

and never improve a reality
just their vanity

that being why
only those

created idiots products
because no one in their right mind
at such a suicide
will participate

for what ?

only woman
biologically adapted
to adaptation can do this

and all men
being already dead

zombies
just more dying every day !

all this having been said
could also be the reason
why darwin his thesis

not previously published

because he knew maybe instinctive
that this does not affect humans at all
may not apply

and this one homo sapiens
therefore only sporadically
appearing on this world

meanwhile he being the only one
in a homo sapiens society
so with our trillion

on a million times a million worlds
in this universe

a real homo sapiens

recognize humans by

that he can cosmic reality
discussing appreciatively
with every one

but of all these idiot women
only their stupidity as the last point
leave their stupidity stand

because they never can
become something else

just stay being an idiot
because an idiot with the other
compete

staying an idiot

so united
to remain a failure
a loser

so finish jesus off
any real homo sapiens

or in symbiosis with predators
rob out their own world
and of success

they talking

that they can not even creation
can get to let be

let alone
to fulfilling creation

just lose everything
being all of their quality

and that is her whole job
from this mass of idiots

despair every person
being so stupid

that they do not even notice
that this being all their quality

only their complete stupidity
so this mass of quantity

hence this madness democracy
also determine

that only the majority of idiots
the rest of this world their stupidity
to pushing on possible

where not a single wisdom
no single solution allowed
only certified stupidity
so this mass of stupid
in their stupidity

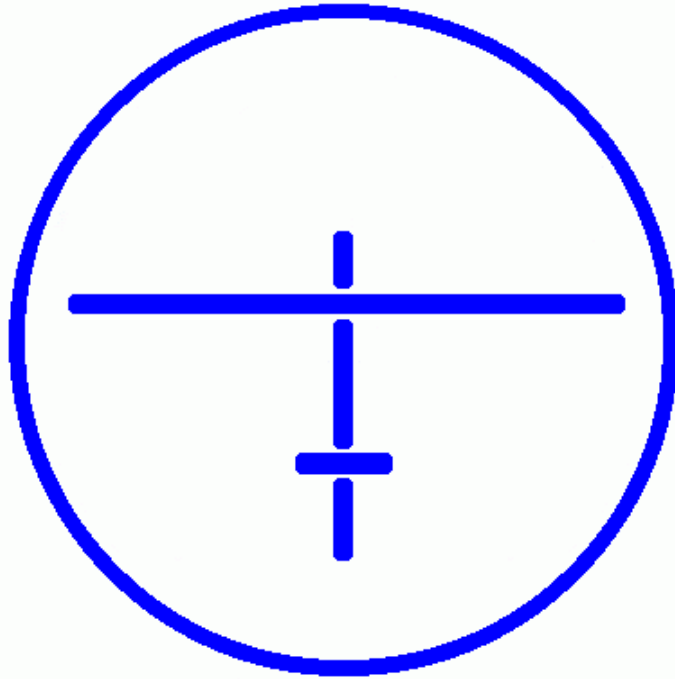

delight

so

their anti quality
being just quantity

and we are the children of
the guardians of
his universe

there while this
planets population
are the misfits of satan
the anti creation

dreaming about a fata morgana

of themselves
as the highest entities
in this universe belonging
to some one else

and as all fata morganas
this can never be realized
this same arrogance
having created

all this aggression > colonization
all this environmental disaster
all these religions that never
having created any thing
but delusion

and as all fata morganas
this can never becoming
may never be realized

because this would be the end
of our universe >

the end of all sapiens
there in

the homo sapiens ...

being the basis of our civilization
for our success in eternity

with his never ending wisdom > his total responsibility
where no one ... no idea ... no solution will be shunned >
no resource being wasted > no environment being spoiled >
no security measure left out

where there is no hierarchy >
because every one is the most important being !
at our never ending paradise on any world
in this universe

we at the galactic foundation > are searching constantly
finding any and all danger to our society
coming from degeneration and pest

keeping every homo sapiens informed >
what a difference they are making !

there while any and all danger to our universe
will be eliminated through >

our galactic pest control program ...

the universe ... can not be an organized crime >
with its technology > its predatory instinct
on every world > every galaxy >

yes ... in the whole universe

so ... may not hold people from a responsible way of life
since this is without responsibility
since those organized criminals

understanding only their animal instinct ...

the law of the universe >

each one citizen can only use his world
for a purpose of the universe > for creation !
and not for the destruction of their worlds
and certainly not for the destruction
of all responsible life ...

every little child knowing this in our society !
and everyone can understand it >>>

because they are having a comprehension ...

fellow humans ... should therefore their fellow human >
to be an inspiration and not an inspiration for this >
end to your world > but to be keeping it as long as possible
> meanwhile > all people are so healthy
and always living healthier!

always freed from any danger
doing less and less for their material needs
not this one day throwing away production
not these hamster wheels >

with those migratory locusts economies
the end of your world and the end of all intelligent life

already achieved

a technology may only serve the people

not for his enslavement > not to being terrified to his end
not as a drug > because he's not able to stand this reality
can not bear at all > can not stand

not as a conceit > he would be a success >

not as a distraction > from reality

but we need homo sapiens > no idiots selection

for a secure future > for a future at all

So we need the education to a homo sapiens

not to a suicide assassin > these all are

because there is no fundamental difference

between any Islamic state > and his religion

or such a satanic state > who puts his delusion through

**no difference between such a terrorist president
or such a freak out > who seeing no other choice
as just to be shooting around > just like all of them
terror states always are killing all resistance !**

just to not grasp > that this whole world being the problem >
and no one has a solution!

nobody wanting a solution ...

the individual ...

can not be let to enjoying his idiotic egoism
at the expense of the environment and its fellow human beings

nor can he be enslaved > to a mass of insane >
to let their masses enjoy idiotic egoism
to destroying their world and destroying the people
to this horrible reality today

the only possibility for a sustainable world
and a society worthy of its people
to an endlessly functioning environment
an endlessly functioning society

be ... that all first
to recognize the need of a valid order!
and implement this > that all >
endless with one another in an open dialogue

every day > always discussing the reality anew
where everyone has a voice > not just the mass >
meaning a majority of insane
as now!

and consequently use this public truth
as a basis for your all decisions made
to realize a real righteous state
to fulfill all valid laws
to living a valid religion

homo sapiens?

only harm can come from them!
to the climate > the resources >
the seas > the land and the future !

of course to every homo sapiens > who knows
that all this harm to his world will end it ...

we can never help any one
to wanting a paradise
or having wisdom

any one has do
perceive all his trauma
all his enslavement

we can only provide these facts

for the development of all
not for ever more enslavement
and should any one or any group
any planet be a danger to our universe
we will act in self defense

and eliminate this danger

the argumentocracy

why they can not be shaping any future

the judgement

homo.sapiens(a)galactic.foundation

the utopian institute

a department of the galactic university

there being

no problem other than
being on the planet of satan

where every one being here
to destroying creation

as fast as possible

so that no one will becoming jealous
of any real success

meaning there may be no humanity
no homo sapiens . ever

period

the belief in

any fata morgana

can only be bringing death to all

**not one real value
there fore no real success
since not believing in cosmic reality
so we are having this mass
of none believers**

**loosing all
for their vanity orgy
every day**

there being

no real civilisation
no real humanity

because of no real human rights

but just this billion suicide attack
where every one being sucked into

and because no one having any real idea
of what they could be doing

all those are just surviving
as much as they can

by any and all means
becoming then this cruel
and in human suicide attack

wasting all environment
any and all humanity

we are

researching
a possibility

to developing
out of these billions
a humanity

where everyone is inspiring
to fulfilling himself

to then help every other
in our humanity

to fulfillment

and not this flight from reality
this destroying in anger

where in a hundred years
the end of all life
already achieved

we already know
that this glorified democracy
being a big problem

because you do not ask
a totally flabbergasted entity
their soul and character destroyed

what a disaster
he wants to have ! ?

but ask everyone publicly
what a solution he can imagine
what we can do in reality

to save our world
and have a humanity

knowing
what they all are

and no biological madness

no vanity ... no fata morgana

we as well know
that predators never
worthy of a human want to live

that they humanity
only can harm

therefore
they all have to be first used
and then we have all this nourishment
for our humanity

those predators would eat
and then they no longer
protect their interests

and draw their energy from destruction
but not out of inspiration of humanity

and that is probably the biggest problem
to developing a human race

because as long
as all are just destroying
to survive

enslave others ... injure
all the insistence on consumption

endless harm
senseless ... harmful work

and not put forward any arguments
for a solution

no one can
even think about a humanity to happen

so ...

this being the problem we have here
we have to solve together

nobody can do that alone

now let us see
whether anyone can

understand what is the problem ?

what we have to do
to have a humanity
to having a future

it all being about
the total conviction
no longer any compromise

it is about
no more physical force
but only point out verbally
and the endless verbal resistance
against this dehumanization

which no one should tolerate
in every ones interest

no quackery
no entertainmant
no fata morgana

according to the law of this universe
any entity may use this creation for his fulfillment
for the fulfillment of his humanity

but never to destroying any environment
any human

this hierarchy of infinite liberation
of every responsibility ...

everybody understood
every consciousness ...
of course wisdom

can in principle have no future
no human order

only this compulsion
to being a biological insanity
where there is no individuality
because everyone is united

in this one infinite liberation
from an individual can be

there ... yes ... this tyranny
such an idiot all dictate
that only the mass of insane
take over so it may be

from the ideal this power seizure
not any individuality to be
just this vanity

being boundlessly enslaved
to losing your future

naturally every human dignity

for this reason
being every election
the beginning of a new tyranny

all these dodos ...

only have their mass
of guaranteed dying out population
because being out of their minds

since they are only supposed to show off
bragging about how stupid they have to be !

and should any one give them
offer them someone solutions
even a future

or to guarantee human rights
dignity for every human !

then they just say
they would only be on
their urge of their stupidity
this whole world to force upon

because they are too stupid
so they could be able at all
to talk about their stupidity

but just keeping their idiots existence
to impose on everyone until he is redeemed
getting ill ... freaking out >

so all dodos can say
" we knew it "

that we all
not in our stupid republic
capable of not competing
with our stupidity

just finish off
because we have no other choice
for everything else we are too stupid for

we have no interest
to get a world saved
even a humanity

so we do not have any arguments
no one offer except

" be the greatest idiot in the universe
and help us all still potentials
with a spark of mind
finish off "

" then we idiot dodos
never having to admit our stupidity
and that being our whole existence

all of our doings
our whole vanity ! "

" so ... now we are flying to chile
in the national park of patagonia

and enjoy the beauty
that we going to destroy

by using
this hell machine air plane
not out of necessity

because we could
take the outrigger sailboat
that we offered

so it is just about doing harm
that we radiate all the time

this bragging dodo existence
since this every human
must despair

and that being our only goal "

and any fool
should live high
have climate tilt rights
surgeon butcher rights
pharmaceutical drug poisoning

escape from any responsibility
guarantee

no homo sapiens !

can there be on this world
because women definitely do not tolerate
she needs such a pampering paradise
where it is all about love
making !

and such an organized crime ?

competing with to be
a successful organized crime!

and whether there is a future possible
those darwinians could not care less

these are basing any decision on
what was successful

and that was no responsibility
no spark of wisdom

so no one can violate it
so > no homo sapiens !

only the homo habilis !
this capable planet destruction technology monkey
and all this darwinian probaganda
of this great success

of course the escape from any responsibility
so ... all these artificial sounds ...
artificial pictures

and re fueling and stepping on the gas

and flying may be
the quickest escape from reality
there is nothing that can flying
better in the flight from
gruesame reality

hence these captains of the air
the very first choice of women

and these surgeons
butchering humans alive

are also at the top

for getting married
because by them a woman
having no worries

that they do any thing other then

no homo sapiens !

just the dodo
who is guaranteed to die out ...

so ... what should we have to do ?

ofcourse to educate all
to being homo sapiens !

what other alterative is there ???

if

a million x a million x a million sapiens ...

are understanding and valueing each other
for being endlessly fulfilled
through their wisdom

then this emphathy having a positive quality
for this whole universe

on the contrary ...

if 9 out of ten of this planetary population
are loving others for being ... anti ... sapiens
in fact an organized conspiracy

destroying all environment ... all humanity

and having no inclination it all

to becoming sapiens ...

since they are loved and cherished empathically
for helping their organized crime so well

then this being a catastrophe
as well as all those psychopaths
who are not loving those criminals
but just themselves

so empathy having ...
just as tolerance and freedom
liberty ... no intrinsic quality

but it will always depend on who
this empathy is being brought toward

being tolerated
being liberated
being free from

if any one becoming free from any wisdom
as all those western democracies have done
then this being certainly

of no quality what so ever
and this being the reason

all those are not fulfilled as humans
rather being frustrated about being enslaved

becoming more and more frustrated
as time and age is making them aware
that some thing being terribly wrong here
but not being able to put their finger on

since the source of all this
having to be never publicly told

or they are being simply called crazy

being put in psychiatry
where the insane are in charge
so the only way for this universe being
to activate the galactic pest control

since there being no practical other way
to remove this pest for wasting

all environment
all humanity

just about a million true believers
will inherit this world after judgement day
just as the bible has been saying for so long

or do you have any other solution ?

every demonstration ...

showing frustrated people
so stupid

that they can only demonstrate
since they are not allowed to know
do not want to know

that they were not enlightened
were not liberated the last centuries

but are now completely lost
have no chance of fulfillment

since it is not about
freedom to losing everything

so the order
for the final victory over

all intelligent life
so a satanic state
who only having one goal

the envy of every success
to sabotage

as deprivation of liberty
to describe

because people
for their fulfillment
need real successes

no destruction of everything
and everyone

humans need a humanity
and human rights

we should

never be asking

those billions

what kind of flight from
this ... their gruesome reality
they want

but to ask them
if any one is knowing
some one not having lost
all of his mind yet

all of his karakter

having some wisdom
some solution ready

that it will not
bring fulfillment
having all those

artificial sounds
all those billion pictures

those climate flipping rights
all this jetting from one place
where no one having any thing
it all

but diversion
from responsibility
convincing all those
to start contemplating
creating a new reality
organizing a humanity
where every one

can be convinced about
since it will bring life
for ever

and a hundred million years
on this planet alone

a person ...

a homo sapiens

can never never impose on a rat
or a predatory animal

otherwise be
this animal vanity
in danger

therefore a jesus christ must
with his superior intelligence
brought to his death

a galileo finished off !
a giordano bruno ...

because those
already highlighted as an individual
their superiority

and should such only be thousands
that would be unbearable
for such animals

who not even
want to preserve a world
because it comes from their pack
to only compete with animalistic endeavours

and as individuals
they do not have a possible chance!

confronting cosmic reality

is a prerequisite of becoming a sapient
of having a future and a humanity

since as soon as any one is
just caring about his stupidity
some thing just stupid

any one is telling about a fata morgana
because his wanting to be accepted
by this mass of fata morganas

he is creating the sure demise of all
since up front there being no future but sure death
so there being no freedom of religion

just as no state can be free
to not guaranteeing human rights

so ...
every citizen having to believe in
this cosmic reality being his religion
included in his very life

expanding our horizon

to infinity

will free us
from this mass of suicides
being part of

it frees humans
of the infinite freedom
to this suicide assassination
having to bring to full filment ...

since it is all about harming everywhere
not about solutions

and as soon as we see ourselves as a solution
to fulfilling this universe

we become ourselves
our fulfillment

it is about
to solve any problem
before it is a shame to all

so they all have to go
since they are instruments of satan
that no sapient can tolerate

and only believers
of the cosmic reality
will inherit the world

we are the modern teaching
of christianity

which can be free from any dogma
because today we can know everything

so we just believe
what we can understand ourselves
and can talk about anything publicly
and therefore we are immortal

as jesus is immortal

the aspiration

of these billions
of deranged mad idiots
be the prevention
of all

public reality
a real solution
a future

because their whole job
the end of this universe
so the envy of everyone
any real success

that unites everyone
where even the school children
demonstrate against

so create even more co2
driving around for

to these demonstrations
with all this effort
on posters

and information flyers

since all do not even know
that you the children

of crazy zombies
who are not allowed to
only prevent solutions
just the reality

declare mad
and a wise man into the mad house
where they all belong

hence these demonstrations
over all of all of these
totally upset

since there is no wisdom at all
can be ...

therefore this anger at everyone
who at all on this delusion
hints

so a 100 billion
economic stimulus program

that created this pandemic
because nobody flies to china
for what ???

there is also only jealousy
on everyone and every success

so we need
a publication of
this united madness
so the impossible

and we finally need
the enforcement
of human rights

the meaning of life

for a human
is not even potentially given

because the opposite is prescribed
and that is the competition

in this one pest swarm
in this predator pack

so just the opposite
that would guarantee

human rights
any thing being everything
worthy of a humanity

where not only the honor
of all humanity not being guaranteed
but that would be crushed by all

because any and all economic stimulus program
the citizens not having time
to reflecting on his life
every day at night

so that they do not get sucked into this swamp
of madness these billions slip away

with this strived for full employment
this aspired journey to madness

so ... this destruction of man and nature

as soon as a state ...

is guaranteeing

climate flipping rights
predator damaging rights
pharmaceutical drug rights
dr slauther rights

death nourishing rights
respect opinions !!!

then this only can
be a satanic state !

because homo sapiens
organize themselves

only for the human
to guarantee their rights

and eliminate any plague
without compromises

because no one human
will savor climate change rights
and harm with all these others
even tolerate it

let alone savor
these economic stimulus programs
to as soon as possible
go to hell

since this is harming himself
and only vermin will do this

so sapiens just wants his wisdom
with which he is

fulfilling the whole universe
and fulfilling all sapiens
